

Global Macro Trends

Any renewed violation of the US–Iran ceasefire would heighten risks to the global economic outlook.

Global Macro Trends

- ▶ The breakdown of the ceasefire envisaged under the US–Iran memorandum of understanding, the resumption of hostilities and the closure of the Strait of Hormuz have once again heightened uncertainty across international markets and energy prices. As a result, the notable disinflation recorded across the major economies in June is expected to prove temporary. Much will, of course, depend on developments over the coming period, as all scenarios are now open. Against this backdrop, the likelihood of the major central banks raising key policy rates over the coming months has inevitably increased significantly.
- ▶ In the US, recent data and leading indicators continue to point to robust growth in Q2, at a pace similar to (or marginally above) Q1. According to the IMF's latest projections, real GDP growth is forecast to reach 2.3% this year, up from 2.1% last year. Labour market conditions remain relatively healthy, with labour demand and supply broadly in balance. Meanwhile, inflation returned in June to roughly its March level: headline eased to 3.5% (from 4.2% in May) and core to 2.6% (from 2.9%), tempering consumers' inflation concerns and lifting consumer confidence indices — which in turn supports domestic demand. Elevated corporate investment, particularly in technology and specifically in artificial intelligence, should also continue to provide support. Finally, the upcoming Fed meeting (29 July) is keenly awaited; combined with the new Chair's recent semi-annual monetary policy testimony to Congress, it should offer a first read on the emerging internal balance at the Fed, as well as on how monetary policy will be framed and communicated going forward. Attention also turns to President Trump's decisions on tariffs, as a significant portion of them expire during July.
- ▶ In the euro area, the picture of modest growth is holding. Based on the IMF's latest projections, real GDP is expected to expand 0.9% this year and accelerate to 1.2% in 2027. Higher government spending on defence and infrastructure, favourable labour market conditions and June's contained inflation continue to provide support. Nevertheless, challenges to the international competitiveness of European industry (particularly the automotive sector) and a relatively high dependence on energy imports persist. Above all, an appropriate strategy and the delivery of large-scale investment in high technology are required if Europe is not to lose further ground to the US and China — the only way for it to help shape developments and avoid future dependencies.
- ▶ In China, the growth rate slowed to 4.3% in Q2, from 5.0% in Q1, bringing H1 growth to 4.7%, driven primarily by markedly higher exports. Full-year growth is expected at 4.5%–4.7%, within the government's target range. The key constraints remain subdued domestic demand — reflected in low inflation and very modest annual growth in retail sales — and the chronic problems in the property market.

Διεθνείς Μακροοικονομικές Τάσεις

- ▶ Η παραβίαση της εκχειρίδας που προβλεπόταν στο μνημόνιο κατανόησης μεταξύ ΗΠΑ και Ιράν, η επανέναρξη των εχθροπραξιών και το κλείσιμο των Στενών του Ορμούζ ενίσχυσαν την αβεβαιότητα στις διεθνείς αγορές και τις τιμές της ενέργειας. Επομένως, η αξιοσημείωτη αποκλιμάκωση του πληθωρισμού στις μεγάλες οικονομίες που καταγράφηκε τον Ιούνιο αναμένεται να αποδειχθεί πρόσκαιρη. Όλα, βεβαίως, θα κριθούν από τις εξελίξεις το επόμενο διάστημα καθώς, πλέον, όλα τα ενδεχόμενα είναι ανοιχτά. Στο πλαίσιο αυτό, η πιθανότητα ανόδου των βασικών επιτοκίων από τις μεγάλες κεντρικές τράπεζες κατά τους προσεχείς μήνες έχει, αναπόφευκτα, ενισχυθεί σημαντικά.
- ▶ Στις ΗΠΑ, τα πρόσφατα στοιχεία και οι πρόδρομοι δείκτες εξακολουθούν να καταδεικνύουν ισχυρή ανάπτυξη κατά το Β' Τρίμηνο με ρυθμό παρόμοιο (ή και ελαφρά υψηλότερο από) του Α' Τριμήνου. Σύμφωνα με τις νέες προβλέψεις του ΔΝΤ, ο ρυθμός αύξησης του πραγματικού ΑΕΠ προβλέπεται φέτος να ανέλθει στο 2,3% από 2,1% πέρυσι. Στην αγορά εργασίας οι συνθήκες παραμένουν σχετικά καλές, με τη ζήτηση και την προσφορά εργασίας να βρίσκονται γενικά σε ισορροπία. Παράλληλα, ο πληθωρισμός επέστρεψε τον Ιούνιο περίπου στο επίπεδο του Μαρτίου. Ο γενικός διαμορφώθηκε στο 3,5% (από 4,2% τον Μάιο) και ο δομικός στο 2,6% (από 2,9%), μετριάζοντας τις πληθωριστικές ανησυχίες των καταναλωτών και ωθώντας ανοδικά τους δείκτες καταναλωτικής εμπιστοσύνης (ευνοώντας με τη σειρά τους την άνοδο της εγχώριας ζήτησης). Θετικά, επίσης, θα συνεχίσουν να επιδρούν οι αυξημένες εταιρικές επενδύσεις, ιδίως στην τεχνολογία και ειδικότερα στην τεχνητή νοημοσύνη. Τέλος, με ενδιαφέρον αναμένεται η προσεχής συνεδρίαση της Fed (στις 29/7) που σε συνδυασμό με την πρόσφατη κατάθεση της εξαμηνιαίας έκθεσης για τη νομισματική πολιτική στο Κογκρέσο από τον νέο Πρόεδρό της, θα έχουμε μία πρώτη εικόνα για τις νέες ισορροπίες που αναπτύσσονται στο εσωτερικό της, αλλά και τον τρόπο που θα διαμορφώνεται και θα επικοινωνείται στο εξής η νομισματική πολιτική. Παράλληλα, αναμένονται οι αποφάσεις του Προέδρου D. Trump για τους δασμούς, καθώς εντός του Ιουλίου λήγει η ισχύς σημαντικού μέρους τους.
- ▶ Στην Ευρωζώνη, η εικόνα της ήπιας ανάπτυξης διατηρείται. Βάσει των νέων προβλέψεων του ΔΝΤ, το πραγματικό ΑΕΠ αναμένεται να αυξηθεί 0,9% φέτος και να επιταχυνθεί στο 1,2% το 2027. Θετικά συνεχίζουν να επιδρούν οι αυξημένες κρατικές δαπάνες σε άμυνα και υποδομές και οι ευνοϊκές συνθήκες στην αγορά εργασίας, όπως και η συγκράτηση του πληθωρισμού τον Ιούνιο. Ωστόσο, οι προκλήσεις της διεθνούς ανταγωνιστικότητας της ευρωπαϊκής βιομηχανίας (και ιδίως της αυτοκινητοβιομηχανίας) και η σχετικά υψηλή εξάρτηση από τις εισαγωγές ενεργειακών προϊόντων παραμένουν. Κυρίως, όμως, απαιτείται η διαμόρφωση κατάλληλης στρατηγικής και υλοποίησης μεγάλων επενδύσεων στον τομέα της υψηλής τεχνολογίας ώστε η Ευρώπη να μην χάσει επιπλέον έδαφος από τις ΗΠΑ και την Κίνα. Μόνο έτσι θα μπορεί να συν-διαμορφώνει τις εξελίξεις και να αποφεύγει μελλοντικά τις εξαρτήσεις.
- ▶ Στην Κίνα, ο ρυθμός ανάπτυξης το Β' Τρίμηνο επιβραδύνθηκε στο 4,3% έναντι 5,0% το Α' Τρίμηνο. Συνεπώς, κατά το Α' Εξάμηνο διαμορφώθηκε στο 4,7%, με κύριο μοχλό τις ιδιαίτερα αυξημένες εξαγωγές. Για φέτος αναμένεται στο 4,5%-4,7%, εντός του κυβερνητικού στόχου. Τροχοπέδη, ωστόσο, παραμένουν η συγκρατημένη ανάπτυξη της εσωτερικής ζήτησης -που αποτυπώνεται στο χαμηλό επίπεδο του πληθωρισμού και στην πολύ μικρή αύξηση των λιανικών πωλήσεων σε ετήσια βάση- και τα χρόνια προβλήματα στην αγορά ακινήτων.

Bird's Eye View

US Economy

EA Economy

China Economy

The Global Bird’s-Eye View | Global GDP growth has remained resilient, with our leading indicator signaling a modest acceleration; however, this momentum is likely to fade if geopolitical tensions persist.

The Global Bird's-Eye View | The growth differential between emerging markets and developed markets is expected to remain at below average levels for 2026/28.

Real GDP Growth

EM – DM Growth Differential

Global Economic Activity | China’s export momentum significantly strengthened in June due to the global AI boom, a surge in vehicles export and tariff front-loading, while monetary conditions eased in July.

BBG World Growth Tracker & China Exports

KOF Global Barometer Indicator & China Monetary Conditions

Global Trade | World trade increased in April, as the effects of the Iran conflict remained largely confined to the Gulf region. Inventory restocking and demand for AI-related electronics continued to underpin trade.

World Trade

World Trade Tracer

World Exports | EM

World Exports Tracer | EM

Global Trends | NY Fed Global Supply Chain Pressure index eased further in June, while the Baltic Dry Index in June eased following a historical high since October'21.

Bloomberg Financial Conditions Indices

Global Economic & Trade Policy Uncertainty (Caldara & Iacoviello)

World Container and Baltic Dry Indices

Global Supply Chain Pressure (NY Fed)

Global Trends | South Korea's export further improvement in June comes from a concentrated but extremely powerful set of drivers, dominated by semiconductors and AI-related demand.

China Credit Impulse (9m lead) & Global industrial production

South Korean Exports & Global Industrial Production

Global Trends | Global inflation continued to increase in June, while both the NY Fed Global Supply Chain index and the Dallas Fed Index of Economic activity decelerated.

China Export Prices & Global Inflation

Global Economic Activity vs Global Supply Pressure

Global Trends | EA’s real policy rate returned to 0% in June following 11 months of negative rates, as core CPI eased in China, the US and EA.

Bird's Eye View

US Economy

EA Economy

China Economy

US Business Cycle | ISM Manufacturing remains into the expansion phase.

US Business Cycle | Based on ISM Manufacturing Indicator

US Business Cycle | Based on Major US Economic Variables

US Recession Indicators | The 10Y3M spread and the ISM Manufacturing New Order Index remain firmly above the threshold levels consistent with recession periods.

10Y and 3M US Treasury Yields Spread

ISM Manufacturing New Order Index

Conference Board Survey | Consumer confidence inched up in June. Weaker current conditions were offset by improved expectations. The gap between the Leading and Coincident indicators remained unchanged in June.

Difference between Consumer Expectations and Current Situation Indicators (Conference Board)

Difference between Leading & Coincident Indicators (Conference Board)

US Macro Expectations | Economic data continues to surprise to the upside, with inflation surprises positive in June. Growth expectations have stabilised; 2026 inflation expectations moved modestly lower.

Economic & Inflation Surprises

Growth Rate Expectations*

Inflation Rate Expectations*

*Solid line: Consensus; Dotted line: Fed projections

US Leading Indicators | Manufacturing remained in expansion despite a softer-than-expected reading. New orders decelerated but still showed strength, while Inventories improved entering expansion territory.

US Leading Indicators | ISM Services index eased to 54 in June indicating slower but still solid expansion in business activity and demand, while employment rebounded into growth.

ISM Services & New Orders Indices

ISM Services & New Orders Index Minus Inventories Index

US | Industrial Production rose 0.1% in June (+1.14% yoy), with business investment picking up in Q1 and Core Capital Goods Orders accelerating in Q2 2026.

Industrial Production & ISM Manufacturing

Core Capital Goods Orders & Business Investment

US | Advance Retail Sales rose 0.2% in June on a monthly basis (+6.7% yoy) and ISM Services fell moderately. University of Michigan consumer expectations improved in July.

Retail Sales & ISM Services

Personal Consumer Expenditure & University of Michigan Consumer Expectations Index

Housing Market | Residential investment declined further in Q1 and House Permits deteriorated in Q2. Home builders' expectations fell in July as affordability concerns continued to weigh on buyers.

Housing Market | New home sales fell in May as 30-year mortgage rates remain above 6 percent. The S&P/Case Shiller National Home Price Index posted only a modest 0.85% annual gain in April.

NAHB Index & S&P/Case Shiller Home Price Index

US new home sales and 30-year mortgage rates

Fiscal Policy | Still too loose vs unemployment. There was a small improvement in the Fiscal Balance to GDP ratio in Q2 . Challenges ahead remain.

Fiscal Policy | No significant change in the Debt/Nominal GDP ratios in Q1 2026. The long-term trajectory remains concerning.

US GDP Outlook | Leading indicators point to resilient growth in real GDP.

GDP & ISM Manufacturing Indicator

GDP & CB Leading Indicator

US GDP Outlook | About 7% of banks tightened lending to small businesses. Real M2 remains marginally supportive of growth.

US GDP Outlook | GDP growth picked up in Q1 2026 following the government shutdown in Q4 2025.

US Labour Market | The June Jobs report surprised negatively. Net downward revisions of 74k to prior months brought the 3-month average to 111k. Unemployment moved down to 4.2%.

Employment & Leading Manufacturing Indicator

Nonfarm payrolls & Unemployment

US Labour Market | While unemployment expectations improved in July, labour market perceptions softened in June, as the jobs “plentiful” minus “hard to get” differential narrowed to +2.4%, a multi-year low.

Unemployment Rate & expected increase in unemployment 1yr ahead (UMich)

Conference Board Labor market differential & Unemployment rate

US Labour Market | NFIB's June survey showed a net 28% of firms raising compensation (down from 31%). The JOLTS Quits Rate held at 1.9% in May, and Average Hourly Earnings rose to 3.5% in June.

US NFIB small business survey

Wages & Quits Rate

US Wage Tracker | Private employment costs, Compensation plans, Average Hourly Earnings and Atlanta's Fed Wage Tracker are trending lower.

Employment Cost & Leading Indicator

Wages & Leading Indicator

US Labour Market | Weekly Initial Jobless Claims at 208k in mid July. With 1.3 job openings per unemployed, labour market tightness is close to pre-pandemic norms.

Weekly Initial Jobless Claims

Demand & Supply in Labour Market

US Labour Market | Consumer sentiment rose in July but still weak in absolute terms; Q1 private wages & salaries point to easing wage growth.

US Alternative Inflation Metrics | Flexible, sticky and producer prices all decelerated in June although import prices rose to 7.1% (from 6.6% in May).

Producers Price Index and Import prices

Sticky & Flexible Prices

US Supply & Demand Gap | Price pressures are easing across regional Fed surveys and the ISM.

Backlog of Orders & Customer Inventories Relation

Leading Prices Indicators

US Inflation & Energy Prices | Energy prices have come down significantly. ISM Manufacturing Prices Paid Index dropped in June from 82.1 to 73.

Inflation Rates & Energy Prices

Inflation Rate & Leading Prices Indicator

US Headline & Core Inflation | June data signaled falling price pressures and downside risks to PCE inflation, with consumers' long-term inflation expectations still above market pricing (3.3% vs 2.4%).

Inflation Rates

Long-Term Inflation Expectations

US Inflation Outlook | PCE inflation is set to remain elevated through 2026 per our statistical model, with base effects expected to drive it lower from Feb-27. The macro model has yet to capture the lagged impact of WTI.

Inflation Rate Forecast | Statistical Model

Inflation Rate Forecast | Macro Model

US Interest Rates | US productivity growth moderated in Q4 2025 from very strong prior quarters and decelerated further in Q1 2026; real policy rate is currently below neutral rate HLW R*.

US Yield vs Medium-Term Interest Rate Expectations

Bird's Eye View

US Economy

EA Economy

China Economy

EA Business Cycle Watch | In June, economic sentiment remained in the recession phase, while manufacturing confidence is still in the recovery phase but approaching the axis.

EA Business Cycle | Most key economic indicators now signal a recessionary phase while the ESI declined only in France in June.

EA Macro Expectations | In July, economic surprises improved further and have now a positive sign. Consensus growth and price expectations for 2026 & 2027 remained marginally unchanged.

Economic & Inflation Surprises

Growth Rate Expectations*

Inflation Rate Expectations*

*Solid line: Consensus; Dotted line: ECB projections

EA Leading Indicators | In June, manufacturing and services confidence improved marginally, while leading services demand and leading manufacturing indices both worsened.

EA Business Conditions | In June, PMI in Manufacturing decreased at 51.4 from 51.6 in May but remained above the 50 expansion threshold marking the 5th month of growth driven by inventory building.

EA Business Conditions | Retail sales rose 1.6% YoY in May from 0.9% in April, as Services PMI increased accordingly. Though, consumer general expectations contracted further in Q2.

EA Construction | Resilience in the residential sector persists, though the first signs of a slowdown are now visible, especially in permits.

EA Construction | A stabilisation in residential investments is projected over the next few months, as demand for mortgages decreases further in Q3 2026.

EA Fiscal Policy | The fiscal deficit has moderated, with the unemployment rate remaining at historic lows.

Fiscal Thrust

Fiscal Policy & Unemployment Rate

EA Fiscal Policy | Debt levels have moderated after the pandemic but are on an upward trend.

Debt / GDP

Fiscal Policy Sustainability

EA GDP Outlook | Credit impulse tightened further in Q2 2026, while credit standards for lending to businesses worsened in Q3 2026, driven by ongoing geopolitical pressures and energy market related risks.

EA | The contraction in manufacturing new orders improved modestly in Q3 2026, whereas the unchanged real M1 points to lower levels signals slightly tighter liquidity conditions.

EA GDP Outlook | Economic and manufacturing sentiment moderated signaling a slowdown in economic activity.

EA GDP Outlook | Real GDP remained stable on quarterly basis (0.0% QoQ) in Q1 2026, while it grew by 0.5% YoY in Q1 2026 from 1.1% in Q4 2025 and is projected to grow at a slower rate.

Note: Covid-19 period (Q4 2019 - Q2 2021) is excluded from the estimation

EA Labour Market | Number of unemployed persons decreased in May, while sentiment and manufacturing indicators remain volatile in the euro area.

EA Wage Tracker | The Indeed wage indicator remained at 2.8% in May-June. The ECB's Wage Tracker indicates a modest wage growth increase in 2026, though negotiated wages growth moderated in Q1 2026.

EA Inflation Pressures | Headline CPI decelerated to 2.8% in June from 3.2% in May, as did Core CPI to 2.4% from 2.6%. Consumer inflation expectations deteriorated in June.

EA Inflation & Energy Prices | Brent's sharp jump keeps oil prices biased to the upside amid geopolitical tensions, although a decompression in brent is expected to cool down immediate inflationary scares.

Inflation Rate & Oil Prices

Inflation Rate & Leading Manufacturing Prices Index

EA Inflation Outlook | The 2% target is expected to be missed for the year according to our statistical model.
The Macro model that includes the price of Brent points to higher inflation ahead.

Inflation Rate Forecast | Statistical Model

Inflation Rate Forecast | Macro Model

EA Interest Rates | EA population and productivity growth near zero; real policy rate below HLW neutral rate (R*)

EA Interest Rates | EA Inflation expectations one year ahead still rising; Depo Rate & Adjusted HLW R*

EA Inflation & Inflation Expectations one year ahead

EA Depo & Nominal HLW R*

EA Interest Rates | ECB Speak Index is trending up; Inflation surprises are close to zero.

ECB Speak Index & ECB Deposit Rate

Positive index → Indicates a hawkish tone, meaning the central bank is leaning toward tightening monetary policy (raising interest rates, reducing liquidity).
Negative index → Indicates a dovish tone, meaning the central bank is inclined toward easing monetary policy (lowering rates, adding liquidity).

Inflation Surprises & ECB Deposit Rate

Positive index → Indicates that inflation has been higher than expected

Negative index → Indicates that inflation has been lower than expected

EA Short-Term Rates | Forward rates suggest higher levels of interest rates.

Interest rates | Market Expectations

ECB Policy Rate vs German 2Yr Yield

EA Short-Term Rates | Almost 2 hikes are anticipated by the markets by the end of 2026.

EA Interest Rates | Policy Rate vs Fundamental Drivers: Wages and Persistent Inflation

ECB Depo Rate & Negotiated Wages

ECB Depo Rate & Persistent Common Component of Inflation

Fitted vs Actual

Residuals

EA Rates | In June, the ECB raised interest rates for the first time in nearly three years by 25 bps, due to intensifying inflationary pressures but kept them unchanged in July adopting a wait-and-see stance amide energy-price volatility.

DE 10Y, DE 30Y Yields & Eonia 3Y1Y

German Yield Curve

In the context of investment services offered by the Bank and/or any other Piraeus Group companies in general, there might be cases whereby conflict of interests may arise in relation to the information provided herein. Reference should be made to the fact that the Bank, the relevant persons and/or other Piraeus Group companies indicatively:

Are not subject to any prohibition in relation to trading on own account or in the course of providing portfolio management services prior to the publication of this document or the acquisition of any shares prior to any public offering or the acquisition of any other securities.

May offer upon remuneration investment banking services to issuers for whom this document may contain information.

May participate to the issuers’ share capital or acquire other securities issued by the aforementioned issuers or attract other financial interests from them.

Might provide market making or underwriting services to issuers that might be mentioned in this document.

Might have published papers the content of which is different or incompatible to the information presented herein.

The Bank as well as the other Piraeus Group's companies have enacted, implement and maintain an effective policy, which prevents circumstances that may give rise to conflicts of interests and the dissemination of any information among the departments (“chinese walls”) and they also constantly comply with the provisions and regulations relevant to inside information and market abuse. Also, the Bank confirms that it doesn’t have any kind of interest or conflict of interest with a) any other legal entity or person that could have participated in the preparation of the present document and b) with any other legal entity or person that couldn’t have participated in the preparation of the present document, but had access to it before its publication.

It is duly stated that: the investments described in the present document include investment risks, among which the risk of losing the entire capital invested. In particular, it is stated that;

The figures presented herein refer to the past and that the past performance is not a reliable indicator of future performance.

In case the figures refer to simulated past performance, that past performance is not a reliable indicator of future performance.

The return on investments might be positively or negatively affected as a result of currency fluctuations, in case the figures are denominated in a foreign currency (other than Euro).

Any forecasts in relation to future performance, may not be a reliable indicator of future performance.

The tax treatment of the information as well as transactions pertained in this document, depends on each investor's individual circumstances and may be subject to change in the future. As a result, the recipient should seek for independent advice in relation to the applicable tax legislation.

The distribution of the present document outside Greece and/or to persons governed by foreign law may be subject to restrictions or prohibitions according to the applicable legislation. Therefore, the recipient of the present should seek for independent advice in relation to the applicable legislation, in order to look into such restrictions and/or prohibitions.
