

Global Macro Trends

The Fed joins the rate-hiking cycle, after the ECB and the Bank of Japan

Global Macro Trends

- ▶ Tensions in the Middle East remain elevated, with no visible prospect of de-escalation in the near term, heightening concerns about a challenging winter for energy supply. The outlook is further complicated by the continued drawdown of strategic reserves, the depletion of oil and natural gas inventories along the supply chain, and the unusually low seasonal fill levels of European natural gas storage. In addition, damage to oil and gas extraction, refining and transport facilities in the Persian Gulf region (and, to a lesser extent, in Russia due to the war in Ukraine) is constraining available supply and will take time to repair. As a result, competition among countries to secure adequate energy supplies is intensifying, refining margins have widened considerably, and energy prices remain high. Against this backdrop, the major central banks (Fed, ECB and BoJ) raised their policy rates by 25 bps in September to contain expected inflationary pressures, while leaving the door open to further hikes depending on incoming data.
- ▶ In the US, the latest data and leading indicators suggest that the economy continues to grow at a solid pace. Labour market conditions remain fairly favourable, with labour supply and demand broadly in balance. Inflation, however, although it has returned to its March level, remains relatively high and is likely to rise further in the months ahead as higher energy prices feed through to the wider economy. In this context, consumers have become more pessimistic, signalling a possible slowdown in consumer demand growth ahead. At the same time, increased corporate investment, especially in AI-related technology, continues to support growth.
- ▶ In the Eurozone, the upward revision of Q2 growth to 0.6% quarter-on-quarter was a positive surprise (Q1: 0.0%). However, the improvement was driven mainly by stronger growth in Ireland. More broadly, favourable labour market conditions, rising exports, higher defence and infrastructure spending, and investment in high technology continue to support growth. Meanwhile, the rise in inflation driven by higher energy prices remains more limited than in similar past episodes. In Q3, moderate growth appears to be continuing, albeit at a slower pace than in Q2.
- ▶ In China, the latest economic data and leading indicators were generally subdued. Retail sales rose by 0.4% year-on-year in August and industrial production by 5.2%. Exports, however, which remain the main growth driver, continued to grow strongly, rising by 25%. Meanwhile, headline inflation stood at 0.8%, which, together with the weak retail sales figures, reflects the limited contribution of domestic demand to growth.

Διεθνείς Μακροοικονομικές Τάσεις

► Η τεταμένη κατάσταση στη Μέση Ανατολή, χωρίς ορατή προοπτική αποκλιμάκωσης βραχυπρόθεσμα, εντείνει τις ανησυχίες για έναν ενεργειακά δύσκολο χειμώνα. Η εικόνα περιπλέκεται περαιτέρω από τη συνεχιζόμενη μείωση των στρατηγικών αποθεμάτων, την εξάντληση των αποθεμάτων πετρελαίου και φυσικού αερίου κατά μήκος της εφοδιαστικής αλυσίδας και τα ιδιαίτερα χαμηλά, για την εποχή, επίπεδα πλήρωσης των ευρωπαϊκών αποθηκών φυσικού αερίου. Επιπρόσθετα, οι ζημιές σε εγκαταστάσεις εξόρυξης, διύλισης και μεταφοράς πετρελαίου και φυσικού αερίου στην περιοχή του Περσικού Κόλπου και δευτερευόντως στη Ρωσία λόγω του πολέμου στην Ουκρανία, περιορίζουν τη διαθέσιμη προσφορά και απαιτούν χρόνο για την αποκατάστασή τους. Ως αποτέλεσμα, εντείνεται ο ανταγωνισμός μεταξύ των χωρών για την εξασφάλιση επαρκών ποσοτήτων ενεργειακών αγαθών, έχουν διευρυνθεί ιδιαίτερα σημαντικά τα περιθώρια διύλισης και διατηρούνται υψηλά οι τιμές της ενέργειας. Στο περιβάλλον αυτό, οι μεγάλες κεντρικές τράπεζες (Fed, EKT και Ttl) αύξησαν τον Σεπτέμβριο τα βασικά τους επιτόκια κατά 25 μ.β., επιδιώκοντας να περιορίσουν τις αναμενόμενες πληθωριστικές πιέσεις, ενώ διατήρησαν ανοικτό το ενδεχόμενο περαιτέρω αυξήσεων ανάλογα με την εξέλιξη των οικονομικών στοιχείων.

► Στις ΗΠΑ, τα τελευταία στοιχεία και οι πρόδρομοι δείκτες καταδεικνύουν ότι η οικονομία συνεχίζει να αναπτύσσεται με ικανοποιητικό ρυθμό. Στην αγορά εργασίας οι συνθήκες παραμένουν αρκετά καλές, με τη ζήτηση και την προσφορά εργασίας να βρίσκονται γενικά σε ισορροπία. Από την άλλη, ο πληθωρισμός, αν και έχει επιστρέψει στο επίπεδο του Μαρτίου, παραμένει συγκριτικά υψηλός με πιθανή την περαιτέρω άνοδό του το επόμενο διάστημα καθώς η αυξημένη τιμή των ενεργειακών αγαθών θα επηρεάσει ευρύτερα την οικονομία. Στο πλαίσιο αυτό οι καταναλωτές εμφανίζονται περισσότερο απαισιόδοξοι, ένδειξη πιθανής συγκράτησης της ανόδου της καταναλωτικής ζήτησης το επόμενο διάστημα. Ταυτόχρονα, θετικά συνεχίζουν να επιδρούν οι αυξημένες εταιρικές επενδύσεις, ιδίως οι σχετιζόμενες με την τεχνητή νοημοσύνη.

► Στην Ευρωζώνη, η αναθεώρηση του ρυθμού ανάπτυξης του Β' Τριμήνου στο 0,6% σε τριμηνιαία βάση εξέπληξε θετικά (Α' Τρίμ.: 0,0%). Ωστόσο, πρόκειται για βελτίωση που προέρχεται κυρίως από τον υψηλότερο ρυθμό ανάπτυξης της Ιρλανδίας. Γενικότερα, θετικά συνεχίζουν να επιδρούν οι ευνοϊκές συνθήκες στην αγορά εργασίας, η αύξηση των εξαγωγών, οι αυξημένες δαπάνες σε άμυνα και υποδομές, καθώς και οι επενδύσεις στην υψηλή τεχνολογία. Ταυτόχρονα, η αύξηση του πληθωρισμού λόγω των υψηλότερων τιμών της ενέργειας παραμένει χαμηλότερη συγκριτικά με ανάλογες περιπτώσεις στο παρελθόν. Κατά το Γ' Τρίμηνο, ο ήπιος ρυθμός ανάπτυξης φαίνεται να συνεχίζεται, αν και χαμηλότερος αυτού του Β' Τριμήνου.

► Στην Κίνα, συγκρατημένα ήταν γενικά τα τελευταία οικονομικά στοιχεία και οι πρόδρομοι δείκτες. Ενδεικτικά, οι λιανικές πωλήσεις αυξήθηκαν τον Αύγουστο σε ετήσια βάση 0,4% και η βιομηχανική παραγωγή 5,2%. Ωστόσο οι εξαγωγές, που συνιστούν τον ισχυρότερο παράγοντα της ανάπτυξης, διατήρησαν τον πολύ ισχυρό ρυθμό ανόδου τους (25%). Παράλληλα, ο συνολικός πληθωρισμός διαμορφώθηκε στο 0,8% που σε συνδυασμό με την εξέλιξη των λιανικών πωλήσεων αποτυπώνει την περιορισμένη στήριξη της ανάπτυξης από την επέκταση της εσωτερικής αγοράς.

China Economy

US Business Cycle | ISM Manufacturing firmly in expansion territory.

US Business Cycle | Based on ISM Manufacturing Indicator

US Business Cycle | Based on Major US Economic Variables

US Recession Indicators | The 10Y3M spread and the ISM Manufacturing New Order Index remain firmly above the threshold levels consistent with recession periods.

10Y and 3M US Treasury Yields Spread

ISM Manufacturing New Order Index

Conference Board Survey | Consumer confidence moderated further in August. The gap between the Leading and Coincident indicators narrowed slightly in July.

Difference between Consumer Expectations and Current Situation Indicators (Conference Board)

Difference between Leading & Coincident Indicators (Conference Board)

US Macro Expectations | Economic data continues to surprise to the upside. Inflation surprises turned negative. Consensus Growth and inflation expectations broadly unchanged. 2026 Fed projections higher.

Economic & Inflation Surprises

Growth Rate Expectations*

Inflation Rate Expectations*

*Solid line: Consensus; Dotted line: Fed projections

US Leading Indicators | US manufacturing momentum weakened slightly in August. New orders fell to 53.7 from 56.7 but continue to outpace inventories.

US Leading Indicators | ISM Services index rose further in August to 55.4 indicating continued resilience.

ISM Services & New Orders Indices

ISM Services & New Orders Index Minus Inventories Index

US | Industrial Production was flat in August and +1.4% year on year, with business investment picking up in Q2. Core Capital Goods Orders decelerated slightly in Q3 2026 but remain strong.

Industrial Production & ISM Manufacturing

Core Capital Goods Orders & Business Investment

US | Advance Retail Sales August retail sales rose 1.2% m/m and 6.0% y/y although University of Michigan consumer expectations fell in September (2nd consecutive month of decline).

Retail Sales & ISM Services

Personal Consumer Expenditure & University of Michigan Consumer Expectations Index

Housing Market | Residential investment rose in Q2 (still negative y/y), while House Permits turned positive y/y in Q3. Home builders' expectations fell further in September as affordability concerns continued to weigh on buyers.

Housing Market | The S&P/Case Shiller National Home Price Index posted a modest 1.5% annual gain in June. New home sales fell significantly in July with 30-year mortgage rates reaching 6.8% in September.

NAHB Index & S&P/Case Shiller Home Price Index

US new home sales and 30-year mortgage rates

Fiscal Policy | Still too loose vs unemployment. There was a small deterioration in the Fiscal Balance to GDP ratio in Q2 . Challenges ahead remain.

Fiscal Policy | No significant change in the Debt/Nominal GDP ratios in Q1 2026. The long-term trajectory remains concerning.

US GDP Outlook | Leading indicators point to resilient growth in real GDP.

GDP & ISM Manufacturing Indicator

GDP & CB Leading Indicator

US GDP Outlook | Only 2% of banks tightened lending to small businesses. Real M2 remains marginally supportive of growth.

US GDP Outlook | GDP growth slowed to 1.5% in Q2 2026 from 2.1% in Q1, primarily due to a larger drag from imports, a decline in government spending and lower private inventories.

US Labour Market | The August Jobs report was strong with payrolls rising by 162k. The Unemployment remained at 4.1%.

Employment & Leading Manufacturing Indicator

Nonfarm payrolls & Unemployment

US Labour Market | Unemployment expectations rose in September, but labour market perceptions improved as the jobs “plentiful” minus “hard to get” differential widened to +7.5.

Unemployment Rate & expected increase in unemployment 1yr ahead (UMich)

Conference Board Labor market differential & Unemployment rate

US Labour Market | NFIB's August survey showed a net 31% of firms raising compensation (unchanged from July). The JOLTS Quits Rate fell to 1.9% in July, and Average Hourly Earnings fell to 3.1% in August.

US NFIB small business survey

Wages & Quits Rate

US Wage Tracker | Private employment costs and Average Hourly Earnings are trending lower, but Atlanta Fed's Wage Tracker and NFIB Compensation plans edged up in Q3.

Employment Cost & Leading Indicator

Wages & Leading Indicator

US Labour Market | Weekly Initial Jobless Claims fell to 196k in mid September. With 1.2 job openings per unemployed, labour market tightness is close to pre-pandemic norms.

Weekly Initial Jobless Claims

Demand & Supply in Labour Market

US Labour Market | Consumer sentiment fell further in September; Q2 private wages & salaries point to easing wage growth.

Consumer Sentiment & Unemployment Rate

Compensation per Employee & Unemployment Rate

US Alternative Inflation Metrics | Flexible, producer and import prices accelerated in August.

Producers Price Index and Import prices

Bird's Eye View

US Economy

EA Economy

China Economy

EA Business Cycle Watch | In August, economic sentiment moved to the recovery phase but remains close to the axis, while manufacturing confidence continued in the recovery quadrant.

EA Business Cycle | Most key economic indicators now signal a recovery phase. The ESI rose in August in the euro area, France, Germany, Italy. Greece remains in Expansion despite a small decline.

EA Macro Expectations | In September, economic surprises declined marginally but remained positive. Consensus growth and price expectations for 2027 did not change.

Economic & Inflation Surprises

Growth Rate Expectations*

Inflation Rate Expectations*

*Solid line: Consensus; Dotted line: ECB projections

EA Leading Indicators | Manufacturing and services confidence improved further in August.

Manufacturing Confidence Index & Leading Manufacturing Orders

Services Confidence Index & Leading Services Demand Index

EA Business Conditions | In Aug-Sep, the Manufacturing PMI remained at 52.7 registering its highest level since May 2022. Investments in Q2 increased.

EA Business Conditions | The Services PMI improved in September to 53.0 from 51.6 in August and remained above the 50 threshold, though retail sales continue the downward trend.

EA Construction | The residential sector has started showing signs of deceleration as Investments and Permits decline.

Residential Investment & Construction Confidence

Residential Investment & House Permits

EA Construction | A deceleration in residential investments is projected over the next few months, as demand for mortgages decreases further in Q3 2026.

EA Fiscal Policy | The fiscal deficit remains near 3% of GDP, while unemployment stays at historic lows.

Fiscal Thrust

Fiscal Policy & Unemployment Rate

EA Fiscal Policy | Debt levels have moderated after the pandemic but are on an upward trend.

Debt / GDP

Fiscal Policy Sustainability

EA GDP Outlook | Credit impulse tightened further in Q2 2026, while credit standards for lending to businesses tightened moderately but less than expected in Q3 2026, driven by energy-market-related risks.

EA | Manufacturing new orders contracted less in Q3 2026, while slowing real M1 growth points to slightly tighter liquidity conditions.

EA GDP Outlook | Economic and manufacturing sentiment moderated in Q2. July and August point to improvement in Q3.

EA GDP Outlook | Real GDP in Q2 increased at a solid rate of 1.2% YoY from 0.6% in Q1, while on a quarterly basis economic activity increased by 0.6%.

Note: Covid-19 period (Q4 2019 - Q2 2021) is excluded from the estimation

EA Labour Market | Number of unemployed persons remained unchanged in July compared to the previous month, while sentiment and manufacturing indicators remain volatile in the euro area.

EA Wage Tracker | Indeed wage indicator recorded a 21-month high in August at 3.3%. The ECB's Wage Tracker indicates wage growth increase up to Q2 2027, though negotiated wages growth moderated in Q2 2026.

EA Inflation Pressures | Headline CPI accelerated to 3.3% in August from 2.9% in July, though Core CPI moderated to 2.4% from 2.5%. Consumer inflation expectations increased in August.

EA Inflation & Energy Prices | Brent's sharp jump keeps oil prices biased to the upside amid geopolitical tensions.

Inflation Rate & Oil Prices

Inflation Rate & Leading Manufacturing Prices Index

EA Inflation Outlook | The 2% target is expected to be missed for the year according to our statistical model.
The Macro model that includes the price of Brent points to higher inflation ahead.

Inflation Rate Forecast | Statistical Model

Inflation Rate Forecast | Macro Model

EA Interest Rates | EA population and productivity growth near zero; real policy rate at HLW neutral rate (r^*)

Might have published papers the content of which is different or incompatible to the information presented herein.

The Bank as well as the other Piraeus Group's companies have enacted, implement and maintain an effective policy, which prevents circumstances that may give rise to conflicts of interests and the dissemination of any information among the departments (“chinese walls”) and they also constantly comply with the provisions and regulations relevant to inside information and market abuse. Also, the Bank confirms that it doesn’t have any kind of interest or conflict of interest with a) any other legal entity or person that could have participated in the preparation of the present document and b) with any other legal entity or person that couldn’t have participated in the preparation of the present document, but had access to it before its publication.

It is duly stated that: the investments described in the present document include investment risks, among which the risk of losing the entire capital invested. In particular, it is stated that;

The figures presented herein refer to the past and that the past performance is not a reliable indicator of future performance.

In case the figures refer to simulated past performance, that past performance is not a reliable indicator of future performance.

The return on investments might be positively or negatively affected as a result of currency fluctuations, in case the figures are denominated in a foreign currency (other than Euro).

Any forecasts in relation to future performance, may not be a reliable indicator of future performance.

The tax treatment of the information as well as transactions pertained in this document, depends on each investor's individual circumstances and may be subject to change in the future. As a result, the recipient should seek for independent advice in relation to the applicable tax legislation.

The distribution of the present document outside Greece and/or to persons governed by foreign law may be subject to restrictions or prohibitions according to the applicable legislation. Therefore, the recipient of the present should seek for independent advice in relation to the applicable legislation, in order to look into such restrictions and/or prohibitions.
